Version 6.0.14.3

Version	6.0.14.3
Release date	12/03-2024
Type	Minor release

Bugfixes

Component	Description
Barcode Scanner, Operator Interface	Barcode scan output events ("Product barcode scanned", "Box barcode scanned", "Fail code scanned", "Invalid barcode scanned") have been moved to the barcode scanner asset setup, and they now work as intended.
PLIS Factory	Fixed issue where disabling all options for for Views' header configuration did not cause the header to become hidden.
PLIS Manager, PLIS Factory	Reverted change to color scheme generator for sequence-based results (CPT-X asset types), that caused too similar-looking colors.
